IN REPLYING, ADDRESS THE

January 15, 1951

Communicable Disease Center
Enteric Bacteriology Laboratories
P. O. Box 185
Chamblee, Georgia

Dr. Joshua Lederberg
The University of Wisconsin
Department of Genetics
Madison 6, Wisconsin

Dear Doctor Lederberg:

At present this laboratory is unable to do complete typing of E. coli strains. Dr. Ewing has prepared the necessary O serums and is in the process of making K and H serums. We can group the strains for you but we would be unable to type them at the present time. So far as I know, no one ^{in this country} else₁ is working on this problem.

Very sincerely yours,

Philip R. Edwards, Ph. D.
Bacteriologist-in-Charge
Enteric Bacteriology Unit
